

Early Identification
Program

WHAT IS STEM FUSION?

STEM Fusion is an EIP Program that empowers students to excel in Math and Science coursework. Students attend five Saturday sessions throughout the academic year focusing on STEM education. Students receive support in core math and science subjects. Students also have the opportunity to take Interactive STEM Career Exploration Electives such as cybersecurity, engineering, health sciences, and other career fields.

This year STEM Fusion will be held in person at all three George Mason University campuses, Fairfax, Mason Square, and the Science & Technology campus. Students will be assigned to attend one of the campuses based on the school district they attend. Students participating in Saturday AMP sessions will be excused from AMP on Saturdays that STEM Fusion takes place.

APPLICATION INFORMATION

By submitting this application, the student is confirming their participation in STEM Fusion for the upcoming school year. Please note, all STEM Fusion communication will be sent via email.

Student Orientation (Virtual)

October 18, 2023 (8th & 9th graders) at 4pm
October 19, 2023 (10th-12th graders) at 4pm
